To start running the program, you'll need the following:

1. Java Development Kit (JDK): Download and install the latest version of the JDK from the official Oracle website or OpenJDK if you prefer. You can find the JDK download page by searching "Java JDK download" in your preferred search engine.

2. MySQL Database: Install and set up a MySQL database on your local machine or use a remote MySQL database server. You can download MySQL Community Server from the official MySQL website.

3. MySQL Connector/J Driver: Download the MySQL Connector/J JDBC driver, which allows Java programs to connect to MySQL databases. You can download it from the MySQL website's Connector/J download page.

4. Oracle JDBC Driver: Ensure you have the Oracle JDBC driver (`ojdbc11.jar`) available. This driver is necessary for connecting to Oracle databases. You can download it from the Oracle website.
